Collaboration with IIT Bombay

We are pleased to announce that Madhav University has been collaborated with IIT Bombay through Spoken Tutorial Programme, in association with Ministry of Human Resource Development (MHRD). This 'Talk to a Teacher' activity of the National Mission on Education through Information and Communication Technology (ICT), has been launched by the Ministry of Human Resources and Development, Government of India for students and faculty members. The Programme will provide excellent benefits to students through range of IT Skills Training, Programming Software and Job Oriented Software Training. Spoken Tutorial Programme, IIT Bombay provide knowledge of FOSS (Free and Open Source Software) which will enhance the IT Solutions in different fields building innovative young talents. StartUp to Big MNCs all have started working on cutting edge technologies like Data Science, Machine Learning, AI, Data Analytics, Big Data etc. To enter into those fields programming knowledge of Linux-Ubuntu, C, C++, Java, Netbeans & Python, Scilab, PHP, MySQL, Calc, Python, Latex etc. are required. Spoken Tutorial delivers the valuable knowledge on such programming languages to the learner in an efficient way. It also covers several applications of Operating System, Managing Databases, Mathematical Operations, Spreadsheets, Programming Languages, Web Development and Database Management. Scientific computation packing, Graphic Design etc and university agrees to include Spoken Tutorial as MOOCs for practical courses, wherever possible. It focuses on Skills for Employment and Academic for improving exam performance. It is a Govt. of India, MHRD Initiative offering Software Training - General or Basic, Programming, Specialized, along with certificates. Learner can learn in a language of one's choice, at convenient pace and at convenient time. The tutorials can be considered an e-resource to help students learn and master a variety of software on their own without needing the help of expert teachers. However Students cannot enroll themselves directly, they have to be enrolled by their respective institute and Teacher for a training on a particular Programming Language Software. The method is distance learning and offline learning is possible, without needing Internet. The method is very simple and easy to implement. We do have courses for technical and non technical both the departments. These software courses will help in enhancing both employment and academic performance of students.
