

ABOUT ISM PATNA

WHO WE ARE

The objective of this institute is to pursue excellence in the field of technical & professional education and to groom students to take the responsibilities & challenges of personal as well professional life.

Ambience

The first thing that greets you when you enter ISM is the ambience. We listen from you to understand your need. Extend our valuable services so that you can achieve your goal.

Mentoring Program

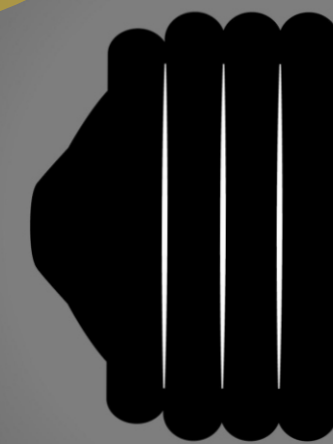

Mentors can help students understand the culture of ISM and navigate its administration in enriching attitude, skills and knowledge of the students. The process of monitoring will definitely help students in attaining valuable education plus in building strong personality and character.

Teamwork

Integration of teachers' ideology with students' aspiration can pave the way to success. Teachers and students need to work in team and at ISM, special emphasis is given on hand holding so that every student is taken well care. ISM rewards interdepartmental and interdepartmental sharing of wisdom and experience to increase in the quality of classroom teaching.

Parental Involvement

Many parents want to know what's going on in class but have no way of figuring out how to do this. Thankfully, this is something that ISM is in practice of to bridge the gap and create awareness among the parents about the performance of the students in the institute.

Faculty Development Program in association with

Spoken Tutorial Project, IIT Bombay

15th June to 20th June

Towards Excellence
ISM Patna

About Programme

Mr. Kanahaiya Lal Ambashtha
Convener

Introduction:

AWK is a language for processing text files. AWK is typically used as a data extraction and reporting tool. It is a standard feature of most Unix-like operating systems. It consists of a set of actions to be taken against streams of textual data for purposes of extracting or transforming text, for eg: producing formatted reports. The language uses the string datatype, associative arrays, and regular expressions. AWK was created at Bell Labs in the 1970s and its name is an acronym derived from the surnames of its authors—Alfred Aho, Peter Weinberger, and Brian Kernighan.

Objectives:

The Participant can learn how to use the wide variety of AWK commands of Linux, to handle files, directories, processes etc.

Participants:

Any faculty of PG/UG/ B.Tech./ Polytechnique, or even professionals who have to carry out any computation using Linux-AWK language.

NOTE

Pre-Registration is mandatory.

E- Certificate will be provided

Attendance Link will be provided
