Spoken Tutorial Project

Subject: Letter of acknowledgment for Blender spoken tutorial

Dear Ms. Pillai,

Spoken tutorial project is a great initiative which can assist many teachers/students all over India. While teaching in Design Department, it is not possible for me to spend lot of my course time in teaching a required software. But unless students are trained in software it is difficult to progress in the course project. Spoken tutorial project has provided the timely help with software training tutorials. This semester, I have introduced a tutorial workshop for Blender in my course on Elements of Form (Second Year BDes). Students are going through these tutorials and using the gained skill to do their course assignments.

I shall let you know the students' feedback towards the end of the semester. Thank you very much for making this resource available to us.

Regards,

Prasad Bokil, PhD
Assistant Professor,
Department of Design, IIT Guwahati
