Sub: Establishing Spoken Tutorial software based training facility in UTDs.

Dear Sir/Madam

Spoken Tutorial based training facility in distance learning mode has been established in University IT Centre recently. Spoken Tutorial Project is an initiative of National Mission on Education through ICT (NMEICT), Govt. of India to promote IT literacy through open Source Software. IIT Bombay has initiated Spoken Tutorial project under NMEICT, Govt. of India for providing software based training on Free and Open Source Software (FOSS) on self-learning concept.

Spoken Tutorial is a simulated method, providing hands-on learning of IT skills to students without needing any expert help in their own labs for different courses. This training is provided by self-learning audio video method in varied subjects like basic sciences, various branches of engineering, life sciences, Arts, Media and advertisement, fashion designing, management etc. Thus, implementation of this project in UTDs will improve skill set of our UG and PG students and enhance their competence with present IT demands in their varied subjects. The students will be awarded certificate by IIT Bombay after successful completion of training.

For implementation of this project at your department, you are requested to nominate one faculty member with name, mobile number and e-mail-id as coordinator. The coordinator in turn will assist in establishing this facility in your department/Institute. Since we are planning to conduct seminar on the same, kindly send the coordinator details latest by 11th January 2015 on e-mail-id: davvstp@gmail.com.

Thanking you.

Sincerely,

Dr. Vrinda Tokekar
(Head, IT Centre)
