WHAT IS SPOKEN TUTORIAL

- Spoken tutorial is an audio-video tool that teaches Open Source Software
- Through active learning method, students learn a software in short, simple steps
- They can replicate the instructions, build and run their own program codes

Advantages

- In programming, the greatest thrill is writing your own program, compiling and running it
- It is well known that listening is always better than reading and that is why this methodology works
- It helps that in addition to reading theory, you see the concept in a small program, practice it and understand it in a very simple way

Created by experts. Over 11 lakh students have been trained in colleges, polytechnics and ITI s in the past 5 years!
