

## 1 The procedure to install KTouch on Ubuntu Linux OS

1. To follow the installation procedure, you need to be connected to the internet.
2. You must have `Synaptic Package Manager` installed on your machine.
3. If not installed, please install `Synaptic Package Manager` using `Ubuntu Software Center`.

### 1.1 The procedure to install KTouch

1. On Ubuntu 11.04 and higher,
  - (a) Press the `Window` key on your keyboard to open `Dash Home`.
  - (b) Type `Synaptic Package Manager`.
  - (c) Click on the `Synaptic Package Manager` option.
2. Enter your password.
3. Click on `OK`.
4. In the search box type `KTouch`.
5. Click on the `KTouch` check box and click on `Mark for Installation`.
6. Click on `Mark`.
7. Finally, click on `Apply`.
8. Again, click `Apply` for installation.
9. The installation will take a few minutes depending on your internet speed.

### 1.2 The procedure to install KTouch via Terminal

1. Open the terminal by pressing `Ctrl + Alt + T` keys together.
2. Now in the terminal type  
`sudo apt-get install ktouch` and press `Enter`.
3. Enter the system password if required.
4. It will display how much has to be downloaded from the internet and how much disk space will be occupied.
5. Type `y` and press `Enter` to confirm this.
6. This will install `KTouch`.

### 1.3 The procedure to check KTouch installation

1. Open the terminal.
2. Now in the terminal type `ktouch` and press `Enter`.
3. This will open the `KTouch` interface.
