Getting started with Lists -Assignments

Assignment-1

1. What happens when you type `mylist[-1]`?

Assignment-2

```
doublelist=['a', ['b','c','d'], 'and', 5, 6, 7, 8]
```

1. What is the command to get the element 'and' in the list doublelist?
2. How would you get 'and' using negative indices?
3. How would you get element 'd' from the list doublelist?

Assignment-3

1. Delete the fourth element from the list doublelist.
2. Remove 'and' from the list doublelist.

Assignment-4

1. How do you create an empty list?
2. Can you have a list inside a list?
3. How would you access the last element of a list without finding its length?
